

The New Corian® Illumination Series & Terra Collection

Surface Products offers Corian's five new icy tones of the Illumination Series. The material of the Illumination Series allow more light to pass through than other Corian® colors, and the ¼" option gives the surface even more translucency. These new features offer new and exciting mediums to combine the enchantment of light with the style of your solid surface.

Surface Products also offers the new Terra Collection, a new line of colors that incorporate 6-13 percent "green" materials. That's right, the 25 colors of the Terra Collection include up to 13% pre-consumer recycled content. Hats off to beautifying your kitchen and the community!

DuPont™Zodiaq® Introduces the Okite® Collection

DuPont has recently added the Okite® Collection to its line of Zodiaq quartz surfaces. Okite® quartz has distinctive veining and original colors made in the heart of Italy. With the addition of the Okite® Collection, Zodiaq adds 9 new exciting colors to its impressive collection.
